Gender Male | Date of birth Feb, 15 1992

Nationality Pakistani

BasitPic.jpg

## PROFILE

Creative and technical web development professional with over one year of experience looking for a position where I can enhance my knowledge of design principles and grow with the organization. I am a JavaScript developer with hands-on experience in HTML, CSS, Bootstrap, and React JS while a basic understanding of Node. I can also create pixel-perfect/mobile responsive websites using any framework with a maintainable code).

## EDUCATION

## Sep-2012 – Jun-2017 BS-Electronics Engineering

School School of Electronics and Computer Engineering

University International Islamic University, Islamabad, Pakistan

## WORK EXPERIENCE

## Dec 2022– Jun 2023 Front-End Web Developer (React.JS)

[AccrualHub](#)

Rawalpindi, Pakistan

## Job Responsibilities

- **Front-End Development:** Develop and maintain user interfaces for web applications using React.js, ensuring high performance, responsiveness, and cross-browser compatibility.
- **State Management with Redux and Redux Toolkit:** Implement Redux and Redux Toolkit for efficient and predictable state management across the application, managing complex data and interactions seamlessly.
- **Context API:** Leverage the React Context API to handle simpler state management tasks or share data between components without the need for global Redux store.
- **Responsive Design:** Create responsive layouts and user interfaces that adapt to various screen sizes and devices, providing an optimal experience for desktop and mobile users.
- **Tailwind CSS and Chakra UI:** Utilize Tailwind CSS and Chakra UI to build highly customizable and consistent user interface components, promoting rapid development and a unified design system.
- **Component-Based Architecture:** Implement a modular and reusable component-based architecture to improve code maintainability and encourage code reusability.
- **Interactivity and User Experience:** Enhance user experiences by implementing interactive elements, animations, and transitions to make the application more engaging and user-friendly.
- **Optimization and Performance:** Optimize the React application for speed and efficiency, identifying and resolving performance bottlenecks, and reducing loading times.
- **Routing:** Implement client-side routing using React Router or other routing libraries to enable seamless navigation between different application views.
- **API Integration:** Collaborate with the back-end team to integrate APIs and handle data retrieval, storage, and manipulation.
- **Form Handling:** Develop forms with proper validation and error handling, ensuring a smooth user experience when submitting data.

Nov 2021 – Dec 2022 Front-End Developer

Soft Cloud Technology

Islamabad, Pakistan

- Job Responsibilities
- **User Interface (UI) Development:** Develop and implement user interfaces using HTML, CSS, and Vanilla JavaScript, translating design mockups and wireframes into fully functional web pages with pixel-perfect precision.
  - **Responsive Design:** Ensure that all UI elements and layouts are responsive and work flawlessly across different devices and screen sizes, providing a consistent user experience.
  - **GSAP Animations:** Utilize the GSAP animation library to create smooth and engaging animations, enhancing the overall user experience and visual appeal of the website or application.
  - **Continuous Learning:** Stay up-to-date with the latest trends and advancements in front-end technologies, frameworks, and best practices, and integrate them into your work when appropriate.
  - **Performance Analytics:** Collaborate with the analytics team to measure and analyze user interaction with the front-end, deriving insights for further enhancements.
  - **Code Reviews:** Participate in code reviews with other developers to ensure code quality, identify areas for improvement, and maintain coding standards across the team.
  - **Collaboration with Back-End Developers:** Collaborate closely with back-end developers to integrate front-end interfaces with server-side functionalities, APIs, and databases, ensuring seamless data flow and efficient communication.
  - **Third-Party Integrations:** Integrate third-party libraries, APIs, and services as needed to enhance the functionality and features of the web application or website.

## JOB RELATED SKILLS

- Programming Fundamental
- OOP (JavaScript)
  - Functional Programming (JavaScript)
  - TypeScript (Basic)
  - Data Structure

- Web Front End Technologies
- HTML
  - CSS
  - JavaScript
  - Bootstrap
  - Bootstrap React
  - Tailwind CSS
  - React JS
  - Redux

- Version Control System
- Git (GUI, CLI)
  - Github

- Animation Library
- GSAP-Green Socks
  - AOS- Animation on Scroll

- Communication skills
- Team work: I have collaborate with the backend Team developer like PHP and Node JS developer.
